

## Problem 9.1

Title: Internet Explorer 11 crashes or gets blocked on every second visit of example.com.

Description: Internet Explorer 11 (Version: 11.0.10240.16384, Window 10 Version 1511) crashes or gets blocked every other time I visit or reload example.com. The bug disappears when JavaScript is disabled on IE11, when ActiveX is disabled and JavaScript is re-enabled or when Google Chrome (Version 50.0.2661.86 (64-bit)) is used. The issue has not been observed on any other website with Internet Explorer 11 (Version: 11.0.10240.16384, Window 10 Version 1511) before.
